Nuclear Engineering and Design 165 (1996) 383–384

Nuclear Engineering and Design

Subject Index of Volume 165

Engineering mechanics

Damage evolution ahead of sharp notches under cyclic loading, S. Sähn, M. Schaper, V.B. Pham, B. Wurm, Th. Husert, E. Winschuh, G. Jaeger 165 (1996) 1

A statistical model for the analysis and prediction of the effect of neutron irradiation on Charpy impact energy curves, P.L. Windle, M. Crowder, R. Moskovic 165 (1996) 43

Correlation coefficients for modal response combination of non-classically damped systems, Ajaya K. Gupta, Tasnim Hassan, Abhinav Gupta 165 (1996) 67

Element bowing assessments of CANFLEX fuel bundle during in-reactor service and refuelling, Ho Chun Suk, Ki-Seob Sim, Joo Hwan Park 165 (1996) 81

Stress analysis and fatigue life prediction for a U-bend steam generator tube, Weili Cheng, Iain Finnie 165 (1996) 101

Analysis of the effect of interaction between shear and bending load on the buckling strength of cylindrical shells, Kazuyuki Tsukimori 165 (1996) 111

Materials properties

Damage evolution ahead of sharp notches under cyclic loading, S. Sähn, M. Schaper, V.B. Pham, B. Wurm, Th. Husert, E. Winschuh, G. Jaeger 165 (1996) 1

A statistical model for the analysis and prediction of the effect of neutron irradiation on Charpy impact energy curves, P.L. Windle, M. Crowder, R. Moskovic 165 (1996) 43

Stress corrosion cracking susceptibility of steam generator tube materials in AVT (all volatile treatment) chemistry contaminated with lead, D. Gómez Briceño, M.L. Castaño, M. García 165 (1996) 161

PWSCC susceptibility of mill annealed alloy 600 in reactor coolant system water during the high pH operation, N. Ogawa, T. Kohno, M. Yamada, R. Umehara, Y. Arimoto, S. Okamoto, T. Tsuruta 165 (1996) 171

Correlation between characteristics of fracture process zone and tension-softening properties of concrete, H. Mihashi, N. Nomura 165 (1996) 359

Mechanical design, component fabrication and testing

Use of an unconventional technique for seismic qualification of equipments, R.I.K. Moorthy, A. Rama Rao, Jyoti K. Sinha, Anil Kakodkar 165 (1996) 15

Response of reinforced/prestressed concrete box structures to dynamically applied torsion, Y.L. Mo, R.Y. Yang 165 (1996) 25

Seismic response of reactor vessel internals for Korean standard nuclear power plant, Myung J. Jhung, Won G. Hwang 165 (1996) 57

Steam generator tube integrity program, D.R. Diercks, J. Muscara, W.J. Shack 165 (1996) 143

Use of power spectral density in deriving response spectral shapes for aseismic design, R.D. Sharma, Sanjeev Kumar, Sushil Gupta 165 (1996) 151

Reactor concepts and systems analysis

Integral nuclear power reactor with natural coolant circulation. Investigation of passive RHR system, O.B. Samoilov, V.S. Kuul, V.A. Malamud, G.I. Tarasov 165 (1996) 259

Objectives in developing the European pressurized water reactor (EPR), Holger Teichel 165 (1996) 271
Challenge to the enhancement of LWRs in Japan, Tsutomu Inoue 165 (1996) 289
Conceptual benefits of passive nuclear power plants and their effect on component design, John C. DeVine Jr. 165 (1996) 299

Structural design, construction methods and testing

Nonlinear 3-D dynamic time history analysis in the reracking modifications for a nuclear power plant, Y. Zhao, P. R. Wilson, J. D. Stevenson 165 (1996) 199

Information

European networks in structural integrity—status in 1995, U. von Estorff, S. Crutzen, R.C. Hurst, P. Lemaitre, B. Hemsworth, L.M. Davies, F. Champigny 165 (1996) 181
The TMI-2 clean-up project collection and databases, Bonnie A. Osif, Thomas W. Conkling 165 (1996) 265

System control and controls

Homogenization of a non-linear array of confined beams, E. Jacquelin, D. Brochard, C. Trollat, L. Jézéquel 165 (1996) 213
Understanding and modelling man–machine interaction, P.C. Cacciabue 165 (1996) 351

Nuclear waste management and disposal

Current status of scientific activity in Russia on high level radioactive waste transmutation and use of weapon-grade and power plutonium in subcritical systems driven by proton accelerator, G.V. Kiselev 165 (1996) 245
Research and development on decommissioning of nuclear facilities in Japan, M. Akiyama 165 (1996) 307

Nuclear safety

Human response in gazing at a moving figure, Hajime Takada, Yuji Sato, Heki Shibata 165 (1996) 239
The spirit of safety: oriental safety culture, Jiro Kondo 165 (1996) 281
Structural integrity and its role in nuclear safety: recent UK advances in the development of high temperature design procedures, C.H.A. Townley 165 (1996) 321
Probabilistic safety assessment: quantitative process to balance design, manufacturing and operation for safety of plant structures and systems, P. Kafka 165 (1996) 333

Thermal hydraulics and safety

Numerical prediction of augmented turbulent heat transfer in an annular fuel channel with repeated two-dimensional square ribs, Kazuyuki Takase 165 (1996) 225
